ABOUT OUR BUSINESS

Founded in 1974, Laxmi Engineering Works has built a legacy of trust and excellence, growing over 50+ years into one of most trusted names in high-performance industrial manufacturing. We design, manufacture, and deliver a comprehensive range of industrial solutions — including oil burners, air blowers, furnaces, pallet furnaces, oil heating & pumping units, and more — serving clients across oil & gas, metalworking, manufacturing, foundry, chemical processing, and beyond.

Building a Legacy of Excellence

At Laxmi Engineering Works, we are driven by a relentless pursuit of precision and an unwavering dedication to delivering the best. Our core values — excellence, integrity, and customer satisfaction — form the foundation of everything we do. From the very beginning, our focus has been on building solutions that industries can depend on, day after day, without compromise.

Innovative Solutions

Developing cutting-edge technology to exceed expectations.

Skilled Team

Engineers, technicians, and support staff dedicated to reducing downtime.

Client Commitment

Customized solutions for smooth and efficient operations.

Clients

Industrial Solutions

Engineered for performance, built for reliability.
Explore our advanced range of industrial solutions.

Oil Burner

High-efficiency oil burners, 3–350 litres/hr, reaching up to 1500°C. Ideal for metalworking, foundry & glass manufacturing.

Explore Brochure

Industrial Air Blower

Heavy-duty electric air blowers available in low, medium & high pressure, with flow rates from 1000 to 6000 CFM for demanding industrial environments.

Explore Brochure

Pallet Furnace

Zero pollution, zero fossil fuels — our Pallet Furnace saves up to ₹37.9 lakhs annually. The future of industrial heating is here.

Explore Brochure

Oil Fired Furnace

Built for extreme industrial conditions, reaching up to 1600°C with capacities from 20 kg to 6 tons. Ideal for melting brass, copper, aluminium, zinc, and forging applications.

Explore Brochure

Electric Furnace

High-efficiency electric furnaces reaching up to 980°C, ideal for aluminium melting with minimal heat loss and power consumption.

OUR CAPABILITIES

Industrial Solutions

Our product range delivers outstanding reliability, reduced downtime, and optimal efficiency across oil & gas, manufacturing, metalworking, and beyond.

Oil Heating & Pumping Unit

Simplex & duplex models, 20 LPM and above, ensuring precise oil heating & circulation for industrial applications.

Explore Brochure

Industrial ID Blower

High-performance smoke extraction blowers, 100 to 21,000 CFM, built for efficient pollution control in industrial chimneys and setups.

Explore Brochure

Industrial Tube Axial Fan

Built for versatile ventilation across chemical plants & industrial environments, delivering reliable airflow from 0.5 to 7.5 HP.

Explore Brochure

Cyclones

Industrial dust and particle separators engineered to control air pollution and maintain clean, safe working environments.

Oil Heating and Pumping Unit

Simplex Model

Laxmi Engineering Works' Oil Heating and Pumping Units are designed to provide efficient oil circulation and heating solutions for industrial applications. These units ensure reliability, durability, and optimal performance for processes requiring precise oil heating and pumping.

Key Features:

Efficient Oil Circulation & Heating

Reliable & Durable Construction

Precise Temperature & Pressure Monitoring

Simplex Configuration for Cost-Effective Operation

Customizable to Meet Industrial Requirements

Features & Specifications

Simplex Model:

Oil Flow Capacity: 20 LPM and above

Motor Capacity: 0.5 HP, 1500 RPM

Heater Capacity: 4 KW and above

Configuration: Equipped with 1 pump and 1 motor

Pressure Rating: Upto 10 Kg/cm²

Applications:

Metalworking

Forging

Foundry

Glass Manufacturing

Chemical Processing

Oil Heating and Pumping Unit

Duplex Model

Laxmi Engineering Works' Oil Heating and Pumping Units are designed to provide efficient oil circulation and heating solutions for industrial applications. These units ensure reliability, durability, and optimal performance for processes requiring precise oil heating and pumping.

Key Features:

-  Efficient Oil Circulation & Heating
-  Reliable & Durable Construction
-  Precise Temperature & Pressure Monitoring
-  Duplex Configuration for Enhanced Reliability & Efficiency
-  Customizable to Meet Industrial Requirements

Features & Specifications

Duplex Model:

-  **Oil Flow Capacity:** 20 LPM and above
-  **Motor Capacity:** 0.5 HP, 1500 RPM
-  **Heater Capacity:** 4 KW and above

-  **Configuration:** Equipped with 2 pumps and 2 motors for added reliability and efficiency
-  **Pressure Rating:** Upto 10 Kg/cm²

Applications:

Metalworking

Forging

Foundry

Glass Manufacturing

Chemical Processing
