ABOUT OUR BUSINESS

Founded in 1974, Laxmi Engineering Works has built a legacy of trust and excellence, growing over 50+ years into one of most trusted names in high-performance industrial manufacturing. We design, manufacture, and deliver a comprehensive range of industrial solutions — including oil burners, air blowers, furnaces, pallet furnaces, oil heating & pumping units, and more — serving clients across oil & gas, metalworking, manufacturing, foundry, chemical processing, and beyond.

Building a Legacy of Excellence

At Laxmi Engineering Works, we are driven by a relentless pursuit of precision and an unwavering dedication to delivering the best. Our core values — excellence, integrity, and customer satisfaction — form the foundation of everything we do. From the very beginning, our focus has been on building solutions that industries can depend on, day after day, without compromise.

Innovative Solutions

Developing cutting-edge technology to exceed expectations.

Skilled Team

Engineers, technicians, and support staff dedicated to reducing downtime.

Client Commitment

Customized solutions for smooth and efficient operations.

Clients

Industrial Solutions

Engineered for performance, built for reliability.
Explore our advanced range of industrial solutions.

Oil Burner

High-efficiency oil burners, 3–350 litres/hr, reaching up to 1500°C. Ideal for metalworking, foundry & glass manufacturing.

Explore Brochure

Industrial Air Blower

Heavy-duty electric air blowers available in low, medium & high pressure, with flow rates from 1000 to 6000 CFM for demanding industrial environments.

Explore Brochure

Pallet Furnace

Zero pollution, zero fossil fuels — our Pallet Furnace saves up to ₹37.9 lakhs annually. The future of industrial heating is here.

Explore Brochure

Oil Fired Furnace

Built for extreme industrial conditions, reaching up to 1600°C with capacities from 20 kg to 6 tons. Ideal for melting brass, copper, aluminium, zinc, and forging applications.

Explore Brochure

Electric Furnace

High-efficiency electric furnaces reaching up to 980°C, ideal for aluminium melting with minimal heat loss and power consumption.

OUR CAPABILITIES

Industrial Solutions

Our product range delivers outstanding reliability, reduced downtime, and optimal efficiency across oil & gas, manufacturing, metalworking, and beyond.

Oil Heating & Pumping Unit

Simplex & duplex models, 20 LPM and above, ensuring precise oil heating & circulation for industrial applications.

Explore Brochure

Industrial ID Blower

High-performance smoke extraction blowers, 100 to 21,000 CFM, built for efficient pollution control in industrial chimneys and setups.

Explore Brochure

Industrial Tube Axial Fan

Built for versatile ventilation across chemical plants & industrial environments, delivering reliable airflow from 0.5 to 7.5 HP.

Explore Brochure

Cyclones

Industrial dust and particle separators engineered to control air pollution and maintain clean, safe working environments.

New Pallet Furnace

Effective. Eco-friendly. Cost-Effective.

NEW PALLET FURNACE

Our Pallet Furnace is designed to safely burn wooden pallets with high efficiency, reducing waste volume and converting it into useful thermal energy. It is a robust, reliable, and eco-friendly solution for industries seeking sustainable waste management and cost savings.

Furnace Comparison Table:

Particulars	Fuel Gas	Diesel	Pallet (Wood)
Heat Value	8500 Kcal /Nm ³	9000 Kcal /Ltr.	4000 Kcal /Kg
Fuel consumption/ Ton Aluminium Liquid	120 Nm ³	115 Ltr.	250 Kg.
Demo Data of Cost Saving If Melting Aluminium Liquid Peer Day = 1.5 Tons*			
Cost/Day	Rs. 13,500	Rs. 16,905	Rs. 6,375
Cost Saving/Day	Rs. 7,125	Rs. 10,530	
Cost Saving/Month (30 Days)	Rs. 2,37,500	Rs. 3,15,900	
Cost Saving / Year	Rs. 25,65,000	Rs. 37,90,800	

*Results may vary based on actual operating conditions.

WHY BUY OUR PALLET FURNACE?

- **Lower Fuel Cost:** Utilizes waste wooden pallets, significantly reducing fuel expenses.
- **High Efficiency:** Advanced combustion system ensures maximum heat output with minimal fuel consumption.
- **Eco-Friendly:** Reduces landfill waste and lowers emissions for a cleaner environment.
- **Reliable Performance:** Built for continuous operation with consistent and uniform thermal output.
- **Durable & Long-Lasting:** High-quality construction ensures strength, safety, and long service life.
- **Easy to Operate & Maintain:** Simple controls and easy access design for hassle-free operation and maintenance.
- **Smart Investment:** Lower operating cost, higher efficiency, and quick return on investment.

Key Features:

Sustainable Solution
Utilizes waste wooden pallets, reducing landfill & promoting resource recovery.

High Efficiency Combustion
Advanced air flow system ensures complete combustion and maximum heat output.

Cost-Effective Operation
Pallets are low-cost or free fuel source, significantly cutting down operating costs.

Durable & Safe Design
Built with high quality materials and safety interlocks for reliable, long-term performance.

Low Emissions
Equipped with secondary air injection to minimize smoke and harmful emissions.

Easy Operation & Maintenance
Simple controls and easy-access design for hassle-free operation and maintenance.

Waste to Energy
Convert wooden waste into valuable thermal energy, supporting a circular economy.

APPLICATION

Industrial
Chauffage & Boilers

Foundries &
Metal Melting
